#### Professional Experience: Personal Project

##### Project

##### [Weather Web-Application | Personal Project](#)

[Link:- Weather Web-applications](#)

- Developed a large-scale, real-world weather application by integrating multiple APIs for accurate and up-to-date data.
- Built a fully responsive and dynamic user interface that delivers current weather information in a clean and intuitive layout.
- Implemented forecast functionality using a dedicated forecast API, enabling dynamically updated multi-day weather predictions.

##### [I-phone Landing Page | Personal Project](#)

[Link :- I-phone Landing Page](#)

- Created a pixel-perfect iPhone landing page using only HTML and CSS, closely following a Figma design.
- Built a fully responsive layout utilizing CSS Grid and Flexbox to handle a complex page structure with precision.
- Designed and developed as part of my HTML/CSS practice to strengthen UI implementation and layout skills.

### Declaration:

I hereby declare that the above provided information is true and correct to the best of my knowledge.

### Project

#### DealXChange | College Project

- Developed DealXchange, a C2C (Consumer-to-Consumer) marketplace platform similar to OLX, where users can upload their products and browse items listed by others.
- Implemented a user-friendly product listing system with image upload, category selection, and detailed product descriptions.
- Built an admin monitoring dashboard allowing administrators to oversee user activity, manage listings, and add or modify product categories.
- Integrated a real-time chat interface enabling seamless communication between buyers and sellers directly within the platform.
